

AMENDMENTS TO THE SPECIFICATION

Please amend the following paragraph as indicated below.

[0014] The space confined within the four posts 31 of the CPU base 3 is received by the heat sink 2, which typically has a square shape corresponding to the CPU base 3. An upper section of the heat sink 2 is formed with a heat discharge assembly 21, which includes a plurality of upright and parallel heat discharge plates. Additionally, a top plate 22 may be disposed at the upper central area of the heat discharge assembly 21 ~~[[22]]~~ to form a greater conduction area.
